## Tutankhamens tomb

Tyrannosaurus Rex was the biggest meat-eater ever to walk the Earth. This terrifying and blood thirsty beast roamed forests 70 million years ago, scavenging for dead or dying prey.

The pre-historic bones of T Rex were first discovered in 1902 by fossil hunter Barnum Brown. Startled by the enormous size of the creature's skull and hipbone, he named it Tyrannosaurus Rex - the tyrant lizard king. Further finds have given palaeontologists ever more detailed

The Bone Wars

Dinosaur fever took hold of fossil hunters in the 1880s as they all rushed to find, and name, new species. Two Americans, Charles Marsh and Edward Drinker Cope, were particularly competitive and between them, they
